

## *New logistics centre for medical products*

Efficient logistics and product availability through an integrated flow of goods and information

Quality products, product availability and efficient order processing are crucial factors to success. Understanding this concept has prompted Salzmann MEDICO to build a new logistics centre in St. Gall.

### The Client

- Salzmann MEDICO, St. Gall, Switzerland
- International supply of medical products
- A growing business
- Workforce: approximately 60

### The Objective

- To centralise logistics (from two sites to one)
- To provide a cost effective logistic infrastructure to support the planned increase in volume
- To achieve minimum process lead times

### The Solution

- Construction of a new, greenfield site logistics centre made up of three elements:
  - High bay storage for pallets in reserve
  - Order assembly and product handling area
  - Office wing

### The Client Benefit

- A logistics concept designed to meet the company's demands
- Simplified, logical flows of products with short paths
- Reduced handling and transportation costs
- Storage systems matched to product flows
